Contents of *Ecological Modelling*, Vol. 70

VOL. 70 NOS. 1/2 NOVEMBER 1993

The study of dissolved oxygen dynamics in the Whippany River, New Jersey using the QUAL2E model
G.N. Van Orden and C.G. Uchrin (New Brunswick, NJ, USA) 1
Dissolved oxygen dynamics in the Whippany River, New Jersey: deterministic/stochastic time-variable model
G.N. Van Orden and C.G. Uchrin (New Brunswick, NJ, USA) 19
A random coefficient model for chlorophyll–nutrient relationships in lakes
K.H. Reckhow (Durham, NC, USA) 35
Discounting initial population sizes for prediction of extinction probabilities in patchy environments
J. Liu (Athens, GA, USA) 51
ECOLECON: An ECOLogical–ECONomic model for species conservation in complex forest landscapes
J. Liu (Athens, GA, USA) 63
Analysis of the cowpea agro-ecosystem in West Africa. II. Modelling the interactions between cowpea and the bean flower thrips *Megalurothrips sjostedti* (Trybom) (Thysanoptera, Thripidae)
M. Tamò (Cotonou, Benin), J. Baumgärtner (Zurich, Switzerland) and A.P. Gutierrez (Berkeley, USA) 89
A kinetic model describing the effect of temperature on the loss rate of pesticides in soil
S.-M. Zhang, D.-S. Liu, Z.-S. Wang and X.-F. Ma (Nanjing, People's Republic of China) 115
Age classification and growth model of *Phrynocephalus przewalskii*
H. Xu (Nanjing, China) and F. Yang (Lanzhou, China) 127
Automatic model simplification: the generation of replacement sequences and their use in vegetation modelling
A.D. Moore (Adelaide, Australia) and I.R. Noble (Canberra, Australia) 137

Conference Announcement 159
Announcement from the Publisher 160

VOL. 70 NOS. 3/4 DECEMBER 1993

Open Invitation to Biosphere Modellers iii

Simplified dynamic model on carbon exchange between atmosphere and terrestrial ecosystems
M. Suzuki, N. Goto and A. Sakoda (Tokyo, Japan) 161

A procedure for generating synthetic weather records in conjunction of climatic scenario for modelling of ecological impacts of changing climate in boreal conditions
H. Strandman, H. Väisänen and S. Kellomäki (Joensuu, Finland) 195

A test of chemical equilibrium equations and assumptions commonly used in soil-oriented charge balance models for soil and freshwater acidification
T.A. Sogn (Ås, Norway) 221

Atrazine leaching into groundwater: comparison of five simulation models
D. Persicani (Piacenza, Italy) 239

A model for heavy-metal pollution of fish populations and exploited fish
Z. Mastala, K. V.-Balogh and M. Perényi (Tihany, Hungary) 263

Age-dependent population dynamics with several interior variables and spatial spread
G.P. Karev (Moscow, Russian Federation) 277

A mathematical model to investigate the demographic viability of low-density samango monkey (*Cercopithecus mitis*) populations in Natal, South Africa
J. Swart, M.J. Lawes and M.R. Perrin (Pietermaritzburg, South Africa) 289

Modeling the effect of daily ration and feeding frequency on growth of redtail shrimp *Penaeus penicillatus* (Alock) at controlled temperatures
S. Miao and S. Tu (Keelung, Taiwan, ROC) 305
